EXPERIENCE

Web Developer I Wellington West Web Design March 2016 – Present

Created multiple Virtual Reality experiences using Javascript VR frameworks • Built numerous Wordpress custom websites and themes from development to production on the MAMP stack for a multitude of clients using PHP, Javascript, jQuery, and Sass • Reconfigured non-responsive sites to conform with the principles of responsive design

Full Stack Developer I Actualize January 2016 – March 2016

Built a full-service web application for a start-up client using Rails, PostgreSQL, Heroku, Puma, and Twilio

Full Stack Developer I Actualize October 2015 – January 2016

12-week immersive software engineering program covering Ruby on Rails, HTML, CSS, JavaScript, Angular, and Git

Administrative Analyst I Village of West Dundee January 2014 – October 2015

Oversaw the creation of 2 new municipal taxes • Aided in the preparation of annual Village budget • Assisted with annual audit preparation, accounts payable, and police and fire pension reporting • Developed a smartphone app geared toward promoting local Village businesses through the use of coupons and other special deals
